

ADF have a proud heritage with over 40 years of providing high quality and durable heating systems. Coupled with a sleek European design and manufacture, ADF brings the next level in quality and functionality to the linear wood heater options in the Australian market.

The unique automatic flue damper system significantly reduces smoke ingress to the room on re-fuelling (available on all models). The simplicity in design of the air wash and primary air system belies how well these beautiful fires operate.

Hayra Freestanding Fire

Hayra 85

- ✓ 5mm steel firebox with matching base
- ✓ High density vermiculite lining system
- ✓ Removable door tool
- ✓ Heats up to 200m² through natural convection and radiant warmth; boosted by an optional fan

Skamol Enclosure for fireplace enclosures

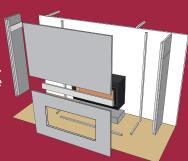

Skamol Enclosure is a light-weight, non-combustible building board that can resist temperatures up to 1000 degrees Celsius. This easy to install product simplifies the construction process by eliminating the need for steel or wood frame constructions. The result is a complete one product solution for your fireplace enclosure that solves a significant challenge facing dealers and installers today – recurring cracks and costly callbacks. When installed correctly, the Skamol Enclosure solution will virtually eliminate cracks.

One building product - multiple design solutions

Due to the strength of Skamol Enclosure, installers are able to apply various finishing materials, e.g. stone and tile. Multiple types of fireplace enclosures can be built using the product.

Most enclosures can be built using only

Skamol Enclosure, replacing the need for light-frame construction and wall covering. This eliminates a complete stage in the construction process, combining multiple building materials into one.

Skamol Enclosure can be used for both traditional and contemporary fireplace installations.

To see more inspiring examples of Skamol Enclosure visit castworks.com.au

The information in this brochure is to assist you in your choice of a suitable fire. It is not intended to be all the information required to install the fire and does not replace the installation manual which provides more detailed information. In the interest of product development ADF reserves the right to change specifications without prior notice.
